We queried a convenience sample of clinical microbiology laboratories nationally and in Miami, FL, about laboratory practices. We contacted the microbiology laboratory director and/or manager in each facility to ask the same questions about their methods for colony counting (manual vs. automated), speciating and reporting results of bacteria growing in MSU cultures based on the number of ...

Unrelated to this study, the clinical microbiology laboratory adopted the modified standard urine culture for diagnosis during patient recruitment for this study. Thus, diagnostic testing for patients 1 to 107 was the standard urine culture, while the modified standard urine culture was used for patients 108 to 150.
