Abstract: Software Engineering Project Standards (SEPS) and their importance are presented in this paper by looking at standards in general, then progressively narrowing the view to software standards, to software engineering standards, and finally to SEPS. After defining SEPS, issues associated with the selection, support, and use of SEPS are examined and trends are discussed.

- The reference list should appear at the end of your paper. Begin the list on a new page.
- The title References should be either left justified or centered on the page.
- The hanging indent for each reference makes the numerical sequence more obvious.
- The entries should appear as one numerical sequence in the order that the material is cited in the text of your assignment.
