~~Java 9 Modularity Patterns And Practices For Developing ...~~

The main goal of the Java 9 module system is to support modular programming in Java. So, by now Java has many first-class citizens, these language attributes: The package and object in OOP (that supports basic object-oriented programming) in Java SE 1.0; the package was introduced to organize Java types.

In this article, I introduce the Java 9 Platform Module System (JPMS), the most important new software engineering technology in Java since its inception. Modularity—the result of Project Jigsaw—helps developers at all levels be more productive as they build, maintain, and evolve software systems, especially large systems. What Is a Module?

Modularity adds a higher level of aggregation above packages.
